

ABSTRACT

Cleaning apparatus, particularly suitable for cleaning the wheels of golf trolleys (20) comprises a support surface (3) along which the trolley is rolled from an entry end (27) to an exit
5 end (28) and manifolds (16), (17) which spray water downwardly and outwardly towards the respective wheels. The rolling surface and inner surface of which each wheel is cleaned directly by the water jets whilst the outer surface of each wheel is cleaned by water bouncing from side walls (6), (7) of the auxiliary cleaning apparatus (30) may be provided for cleaning golf clubs.
